Not worth the frustration or headache

By April Prince-Charles

I did not like this at all. I wanted to use this text and workbook for my son's 7th grade homeschool science. It was extremely wordy, long winded, and overly complicated, this is coming for a science loving teacher and student. I don't know if the creators of this text thought that more complicating and lengthiness would make it a better text book. If you went through the text to highlight what was necessary and important you could delete half the book for extra information included needlessly in the text book.

Great addition to the textbook

By Karla and Dean

This came very quickly. Great addition to the textbook. Perfect for homework or review.
