The Sandhills ecosystem in Nebraska is one of the largest remaining intact grasslands in North America and supports a multitude of plant life. The state flower, the goldenrod, is one of thousands of species of plants growing in the diverse ecosystems found throughout the state. This beautifully illustrated guide highlights over 140 familiar and unique species of trees, shrubs and wildflowers and also includes an ecoregion map featuring prominent botanical sanctuaries. Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Made in the USA.

A Must for the Trail!

By Nik D. Click

This guide was purchased as a gift for a family member. Our Grandmother always had little guides like these around the house jam-packed with great information presented in a simple, easy to follow format conducive

to quick, on-the-fly use. Not only did this guide meet my test, but it far exceeded it. I was skeptical at first of the the "2-page" format listed by Amazon. What I actually received is a fold-out which results in a great deal of detail including regional maps, many illustrations, and information regarding common trees and flowers of the state.

This guide exceeded my expectations. It is perfect for taking out on a nature walk, camping trip or keeping in the glove box to identify whatever the world brings across your path. I suggest pairing with the Nebraska Birds guide for your birdwatching pleasure!

Nice base but a little large for some pockets

By larry hector

It's laminated so you don't have to worry about rain. It has a good beginners base of tree and shrubs.
