God is the sum of all his particles. God's particles are the basis of Realia. It's not just Science Fiction any more.

The God Particle as it is called, or the Higg's boson, is discovered in 2012 in what is the most ambitious and most expensive scientific experiment in history. The next breakthrough comes in 2042, when Quantum Physicists, using the Large Mass Collider, the advanced version of today's Large Hadron Collider run by CERN in France and Switzerland, to disintegrate a human being and accelerate his atoms to the speed of light. Using the new technology volunteers are able to catch up to and commune with the next God Particles that come along. What happens next is the most exciting reorganization of past, present and future events that will dazzle the senses, all based on the most widely accepted principles of the current model of physics.

The American and Chinese governments get involved as a national security precaution due to their concern that the 'God Particles', known to be the most important and fundamental force in the universe, could be used as a kind of "God Bomb". Simultaneously, Kundun Gyaltso, a ten-year-old Tibetan monk, pursues the truth about God's particles through an amazing new REAL-D mandala presentation software he has created and that is eventually downloaded by nearly every computerputer computer and communications device on the planet. The experience literally blows the mind of any audience he entertains until he finally performs the most important REAL-D mandala presentation in history at the White House that will change the world for all time going forward.

'Realia' is the term that will be used for what lies underneath everything else and powers what we think of as "Reality". The subtitle: E Pluribus Unum, Latin for - "From the many, One" is indicative of the the way in which these God Particles work in concert to produce the reality that we encounter with our six senses every day. Realia is a region of space that has never been explored until now. The events in this sci-fi thriller are the precursor of things to come in the not-too-distant future and have never been brought to life before in any medium.

The ending to our story will shock and then, upon reflection, satisfy even the most discerning science fiction fan. Hold on to your laser swords because the real battle to save the galaxy lies in the human mind, not in our armies. In this story, everybody wins, no one loses, and yet civilization - as we know it today - is over. However, the way that everyone wins is through a complete remake of the human psyche and a complete re-write of human history for the last two thousand years. Only the power of the God Particles, present everywhere in our world at all times, can accomplish such a feat.

What is the role of these amazing 'God Particles in your life? To know the answer, you must take a Realia-check.

Great book and a must read

By Burnell Wimberly

I sometimes am an avid Sci-Fi buff and yet I have never read anything this captivating and intriguing. The author captures your imagination right from the start as it's all about The God Particles that were recently discovered by scientists in Geneva Switzerland using the most expensive scientific apparatus in history. When the book arrived, I had extremely high expectations and they were certainly met. This book will certainly have an impact equaled to the writings of Author C Clarke, Isaac Asimov, Kurt Vonnegut, Robert A. Heinlein, Jules Verne, etc. Can't wait to see the movie because I can't Imagine Hollywood creating any special effects even close to the stuff in this book. This book will certainly be entertaining if you are a cerebral.
