Many students want to learn to play piano without spending years on chords, scales, or reading music. They want the knowledge, understanding and the skills in an uncomplicated fashion. They want the lessons that are designed as basic building blocks to help the music knowledge grow with each step. They want a tool that will help them play the songs they cherish, without reading notes.

Welcome to The Bollywood Piano. A self-taught player and music producer himself, Rajan Shah presents us with easy-to-follow, to-the-point, at-your-own-pace instructions. Lesson plans are structured around the students using familiar songs to illustrate basic techniques. To expedite the music reading process, Rajan then moves on to songs that are mostly unfamiliar to Western musicians. He suggests that learning from unfamiliar songs avoids taking a guess for the note, as well as for the duration of the note. This challenges students to read the notes properly by utilizing the skills they are learning, all while introducing them to the exciting music of Bollywood.

Suggested finger numbers for all songs will help students develop needed dexterity, and percussive exercises will assist students in grasping various note values quickly. There are tips and five easy-to-follow songs that are composed specifically by Rajan to assist in ear training.

With this revolutionary new system, which includes 30+ songs, students will gain a solid base from which to grow as musicians in a remarkably short time. Anyone can learn how to play an instrument if they are dedicated, but now, thanks to Rajan Shah, the learning process is easy, fast and fun for the music-lover of any age and level. Terrific. Definitely recommended.

I have played the piano since I was 11. I only took lessons for about two years, and I've always regretted quitting. However, I love to play the piano and am a fairly good master of simplified pieces.

When the opportunity to review *The Bollywood Piano* came, I was intrigued. I was not familiar with any Bollywood music, and the idea that one book could teach you the basics in two days. I'm pleased to say that the book lived up to my expectations.

I sat down at the piano, with the book and my ten-year old son. Since piano lessons aren't an option for us at the moment, I've been going through my old primary music books with him and he has grasped the concept of some things. However, within minutes of sitting down with *The Bollywood Piano*, he was playing *Ode to Joy* with his right hand. I love hearing my son play Beethoven, even just a simplified version!

I learned a great deal from the book: so many points and piano principles that I didn't remember, if I had known them at all. It really is a great, overall instruction manual. You can go through it as fast or as slowly as you want. We're taking a bit of a slow route with it.

Easily recommended for those wanting to learn how to play the piano or who want something to use as they teach their children.
